

Job Title: AI Engineer

Company: [Your Company Name]

Location: [City, State]

Job Type: Full-Time

Job Description:

We are looking for a talented and enthusiastic AI Engineer to join our team. You will be responsible for designing, developing, and deploying AI models and solutions that solve real-world problems and drive business value.

Responsibilities:

- Design and implement machine learning models for classification, regression, and recommendation tasks.
- Build and maintain data pipelines and infrastructure for model training and deployment.
- Collaborate with data scientists, engineers, and product teams to understand requirements and deliver AI solutions.
- Monitor model performance and continuously improve accuracy and efficiency.
- Stay updated with the latest research in AI and apply relevant findings.

Qualifications:

- Bachelor's or Master's degree in Computer Science, AI, Machine Learning, or related field.
- Strong knowledge of machine learning algorithms, deep learning frameworks (TensorFlow, PyTorch), and Python programming.
- Experience with data preprocessing, feature engineering, and model evaluation.
- Familiarity with cloud platforms (AWS, Azure, GCP) and MLOps practices.

- Excellent problem-solving skills and ability to work in a team environment.

Preferred:

- Experience with LLMs or Generative AI models.
- Knowledge of NLP or Computer Vision techniques.
