- ♦ Web Dynpro
- ♦ EWM-RFUI Screens
- ♦ ABAP EWM

Project 1

| Organization | Client | Team Size |
|---|-------------------------------|------------------------|
| INFOSYS BPO | AETNA - US Health Care Policy | 20 |
| Technical Environment: Rumba Mainframe Tool | | May 2016 to March 2017 |
| <ul style="list-style-type: none">Worked for AETNA process as a Process Executive- Operations.Handled Rumba Mainframe Tool.Follow procedures as defined by customer standards.Solved and completed the tickets as per the priority and Service level Agreements (SLA's). | | |

Project 2

| Organization | Client | Team Size |
|---|----------------------------------|-----------------------------|
| KNORR-BREMSE TECHNOLOGY CENTER INDIA PVT LTD | KNORR-BREMSE TCI (In-house Team) | 13 |
| Technical Environment: SAP ECC 6.0 PRODUCTION SUPPORT | | August 2017 to October 2021 |
| <ul style="list-style-type: none">Handling tickets, tasks and responsible for closing the same within defined SLAs.Excellent communication skills with business users.Responsible for root cause analysis and implementing mitigation plan with the help of senior consultant or Team lead.Debugged and resolved technical issues within SLA.Follow procedures as defined by customer standards and always worked on process-oriented projects.Worked on SAP Modules: SD and QM-CCX.Developed few complex Reports like customer master, vendor master.Worked on Smart forms, Sap Scripts, IDocs, SE16XXL, ALV, reports, function modules.Worked on CCX projects.Worked on GST Rollout Project.Worked on IFRS Support Project.Worked on SE16XXL project.Yuppie Web Dynro Application Project.Special Tools: Service Now, Conigma | | |

Project 3

| Organization | Client | Team Size |
|---|--------------------------------|---------------------------|
| CAPGEMINI INDIA | Whirlpool PHS - Implementation | 10 |
| Technical Environment: SAP ECC 6.0 IMPLEMENTATION | | January 2023 to June 2023 |
| <ul style="list-style-type: none">I have developed a complex report – Warehouse breakdown count: Contain & Correct. This Program is used to see the in process holds, Warehouse count, STO in transit and Customer shipped QTY, In transit from customer return, Rework and Release quantity details dynamically. Having editable functionality with save button, handled authorization objects to restrict users to edit and save data.I have developed a complex report – Warehouse Finance Actual Cost entry. This Program has a screen where we can submit the costs for the holds against SIO. Files will get triggered at AL11 folders. Handled authorization objects to restrict users to edit and submit data for FI document posting. In the another posting program, after BAPI posting of FI document, email functionality is developed to triggered emails.I have developed a complex report – Create hold and rework EWM interface. A ECC custom interface report which is passing quality hold serial information & rework information from PHS (Product Hold System) to the EWM system. Once quality holds are created or changed or deleted (includes rework as well) for serial ranges within PHS an | | |

event-based background job will trigger to take the information from PHS tables and update it in the AL11 folder in .csv file format. RFC will trigger which will send this data to EWM & update hold tables in EWM system. The file data will be stored in the EWM table so that the system should know that certain serial numbers are on hold. An RFC will trigger which will send this data to EWM & update hold tables in EWM. Email functionality is developed to triggered emails.

- Fixed all the backend create hold bugs and rework app bugs for Neptune application.
- **Special Tool:** Jira

Project 4

| Organization | Client | Team Size |
|--|------------------------|-------------------------------|
| CAPGEMINI INDIA | Whirlpool EWM - DEVOPS | 5 |
