Objective

Experienced and proactive SAP MM Consultant with 3.6+ years of expertise in implementation, testing, and support across SAP ECC and S/4HANA platforms. Proven ability to deliver efficient procurement and inventory solutions, perform data migration, support end-users, and ensure system reliability. Looking for an opportunity in a growth-oriented organization to apply my SAP knowledge, business process understanding, and commitment to continuous improvement in driving successful project outcomes.

Experience

Digital Crown IT Systems LLP
February, 2025 - till date

SAP MM Principal Consultant
Project type: Testing and Support
• Provided L1, L2, and L3 support in SAP S/4HANA MM environment for procurement, inventory management, and invoice processing.
• Worked on incident and service request resolution using ticketing tools such as SAP Solution Manager.
• Supported end-to-end P2P cycle, including troubleshooting issues related to purchase requisitions, purchase orders, goods receipts, and invoice verification.
• Created functional specifications for enhancements, small developments, and change requests; tested and deployed them in coordination with BASIS and ABAP teams.
• Used basic ABAP debugging in SAP to trace custom logic during issue analysis in MM processes like PR to PO, GR (MIGO), and invoice verification (MIRO).
• Checked data inconsistencies by analyzing custom and standard tables in sap using SE16N, aiding faster ticket resolution.
• Familiar with using SE80, SE38, and SE37 to analyze custom reports and function modules during support tasks.
• Supported CPI-integrated scenarios, including issue identification and coordination with middleware teams for API failures between SAP and third-party systems.
• Prepared and maintained documentation such as SOPs, training manuals, and user guides for custom developed processes.

Jio Platform Limited
December, 2022 - February, 2025

Deputy Manager - Senior Engineer Operations
December, 2022 - July, 2024
Project type: Implementation
• Participated in end-to-end SAP S/4HANA implementation project as SAP MM Consultant.
• Conducted requirement gathering sessions and prepared As-Is/To-Be documentation for procurement and inventory processes.
• Defined and maintained organizational structure (Plant, Purchasing Org, Storage Location).
• Configured MM module components including Material Master, Vendor Master, Purchasing, Inventory Management, and Release Strategies.
• Worked on Master Data preparation and migration using tools like LSMW, LTMC and BDC tools.
• Prepared and executed Unit Testing, Integration Testing (SIT), and supported UAT with business users.
• Created functional specifications for custom developments (Reports, Enhancements etc).
• Coordinated with cross-functional teams (SD, PP, FI) for seamless process integration.
• Configured different document types, release strategies for PO and PR, purchase groups, material groups etc.
• Supported cutover activities including stock upload, open PO transfer, and material balances.
• Provided end-user training and prepared detailed user manuals for MM processes.

August, 2024 - February, 2025
Project type: Testing and Support
• Actively involved in various testing phases including Unit Testing, Integration Testing, and User Acceptance (UAT) to ensure system stability.
• Executed and validated multiple SAP MM test scenarios including Release Strategy, Stock Transport Order, Subcontracting Process, and Inventory Management.
• Prepared and executed comprehensive test cases for standard and custom MM processes, ensuring seamless process flow.
•Conducted testing of custom enhancements specific to Material Management.
• Responsible for preparing and maintaining Functional Specification (FS) documents and Test Scripts in alignment with project standards.
• Handled different types of incidents and tickets ensuring timely resolution within SLA.
• Performed batch job scheduling and monitoring to support background operations.
• Coordinated with cross-functional teams to identify and resolve integration issues across MM, SD, and FI modules.
• Created end-user training documents and manuals to facilitate smooth business transition and user adoption.
• Participated in cutover activities including data validation and mock run testing to ensure business continuity.

	OC Specialities Private Limited **June, 2018 - June, 2019** Project Engineer Project type: Implementation • Assisted in configuring organizational units such as Plant, Storage Location, and Purchasing Groups in SAP MM. • Supported end-to-end procurement cycle processes including PR, PO, GR, and Invoice Verification. • Participated in user support activities by resolving basic MM-related tickets under supervision. • Involved in creation and maintenance of material master and vendor master data. • Executed test scenarios for unit and integration testing during mock cutovers. • Documented functional specifications, process flows, and configuration steps for knowledge management. • Worked on basic SAP transactions: ME21N, ME51N, MIGO, MIRO, MB1C, ME2N, etc. • Assisted in preparing training documents and user manuals for business users. • Supported in tracking and resolving issues related to GR/IR and stock discrepancies.
SAP MM Exposure	• • Enterprise Structure - Configured company codes, plants, purchasing organizations, storage locations and material type with internal number range. • Configured diffrent material groups and purchase groups. • Configured document types for purchase requisition and purchase order with internal number range. • Release strategy for purchase requisition and purchase orders. • Message output determination for purchase order. • Knowledge of Idocs. • Pricing procedure. • Stock transport order. • Split valuation. • Subcontracting process. • Batch management (FIFO). • Batch jobs. • FI-MM Integration - Configuration of account determination (Valuation and account assignment). • SD-MM Integration - Stock transport order and Third party process. • PP-MM Integration - Consumption based planning. • Well versed with end to end implementation cycle - ASAP Methodology. • Physical inventory process. • Vendor consignment process. • Automatic PO creation from PR. • Evaluated receipt settlement (ERS).
