CHINTHAKINDI SUSRITH

SAP SD Consultant

susrithcsap@gmail.com | +(91) 9000 363510 | Hyderabad, India

Professional Synopsis:

Certified SAP S/4HANA SD Functional Consultant with 4 years of experience in SAP ECC and S/4HANA. Skilled in end-to-end Order-to-Cash (O2C) processes, pricing, output determination, and SAP–non-SAP integrations. Successfully delivered a full-cycle S/4HANA implementation and a plant rollout, along with multiple enhancement and integration projects. Proficient in SD configuration, functional specs, IDoc handling, LSMW, and ABAP debugging. Contributed to API-based logistics interfaces, data migration, and the deployment of 15+ non-SAP WMS integrations.

Project Exposure: 1 SAP Implementation | 1 Plant Rollout | 3 SAP Support & Non-SAP Integration | 2 Enhancement

Certifications: SAP Certified Application Associate - SAP S/4HANA Sales 2021 - C_TS462_2021

SAP SD Expertise & Skills:

- Configured organizational structure, pricing procedures, and item categories based on business requirements.
- Hands-on experience in Output Determination configuration and development of Smart Forms for shipping-related documents.
- Skilled in IDoc configuration, monitoring, and troubleshooting for seamless system communication.
- Sound knowledge of Sales and Delivery document types and their customization.
- Familiar with Business Partner setup and Customer-Vendor Integration (CVI) processes in S/4HANA.
- Hands on experience with Customer account group and Partner determination.
- Conducted data migration using LSMW for Customer and Material Master data.
- Good understanding of business processes such as Third-Party Sales, Stock Transport Orders (STO), Individual Purchase Orders, and cross module integration.
- Strong grasp of third-party system integration using APIs, IDocs, and RFC Function Modules to ensure smooth SAP–non-SAP communication.
- Hands-on experience in preparing Functional Specifications (FS) for RICEF developments and working closely with cross-functional teams.
- Good understanding in analysing ABAP function modules, user exits, and enhancement points; capable of debugging for primary issue analysis and support.
